M5 Streptavidin AF594 antibody	100ul	MF861-01

Storage: Store at -20 °C for one year. Avoid repeated freeze/thaw cycles

产品介绍

Streptavidin is a tetrameric protein composed of identical subunits. Each subunit binds one biotin molecule with a KD of ~1x10⁻¹⁵M. The preparation contains an N- and C-terminal shortened variant (core streptavidin) with improved properties concerning homogeneity, solubility, resistance towards proteolytic degradation and accessibility of the biotin binding pocket as compared to native streptavidin. The high affinity recognition of biotin and biotinylated molecules has made streptavidin one of the most important components in diagnostics and laboratory kits.

英文名称 Streptavidin

中文名称 AF594 标记链霉亲和素
